## ***Innerspring Truck Mattresses***

Freightliner Trucks is pleased to announce a new innerspring truck mattress as standard equipment for all Class 8 trucks with SleeperCabs. This is an exciting new, innovative design to increase the sleeping comfort of users when the truck is rolling. These mattresses are “state-of-the-art,” and offer many advantages over traditional truck mattresses.

This new mattress contains the Everflex® spring system that eliminates 20 percent of the mattress bounce created while the truck is in use. Polyurethane foam completely incases the innerspring unit providing greater mattress stability. The construction process virtually eliminates seam wear caused when the driver climbs in and out of the bed area. There are no sewn seams to wear or break open. The use of Thermatuff support zone insulation adds more cushions between the spring and the end user.

The nylon loop knit laminated fabric also has many benefits. The fabric will last 2 to 3 times longer than traditional gray striped fabric, it eliminates absorption of moisture and odors and is easily cleaned. This fabric will not crack, peel or stretch.

### **Selling Points**

- Improved sleeping comfort for the user, even when the truck is rolling
- Innerspring mattress contains the high-quality Everflex® Spring System
- 20 percent less bounce than conventional innerspring truck mattresses
- Fabric is easy to clean with mild soap making it more sanitary
- This innovative mattress is virtually moisture, stain, odor & tear resistant
- New construction technology eliminates sewn edges, reducing seam wear
- Durable, yet soft nylon knit fabric, has a longer life than conventional truck mattress fabric
- This new mattress color better matches the interior of the truck cab & sleeper
- Eliminates the need to “flip” the mattress to obtain a clean, non-worn side
- Meets mandatory MVSS-302 Federal safety standards & strict ISO-9001 quality guidelines
- Proprietary to Freightliner
- Made in the USA

### **Availability**

Freightliner Trucks models with lower bunks in SleeperCabs (effective 4/18/03)

### **Data Codes**

Depend on vehicle model and SleeperCab size
