Salem Vent Comfort Center

Freightliner Trucks believes that a rested driver is a safer and more productive driver. That is why we offer the new Salem Vent Comfort Center on the Columbia, Century Class S/T, Argosy and Coronado models.

Whether sleeping or just spending a few well-deserved hours off the long, grueling highway, drivers will enjoy the free time spent in their SleeperCabs more with the new Salem Vent Comfort Center. The Comfort Center is mounted on the lower sidewall of the sleeper. Working in conjunction with the Salem Two-Way Hingeless Ventilator, the Comfort Center's durable internal fan pulls refreshing outside air through the Salem Vent and circulates it throughout the cab, creating a more comfortable environment for the resting occupant. And all this happens while using minimal electrical power without idling.

A well-rested driver ensures not only the increased productivity of your operation, but his/her enjoyment of the job. The Salem Vent Comfort Center provides that extra touch of comfort needed for a more relaxing break from the road.

- Salem Vent Comfort Center (above)
- Installed on SleeperCab Wall (inset)

Selling Points

- Provides 100 CFM (cubic feet per minute) of fresh, outside air for sleeper cab occupant while vehicle is parked
- More comfortable environment for resting in the SleeperCab
- Specifically designed for the Salem Two-Way Hingeless Ventilator, the Comfort Center does not interfere with the unique function of the Salem Vent while the vehicle is in motion
- Idling not required to operate comfort center
- Maximum electrical draw of only 0.5 amps at full CFM airflow

Availability

Optional on Freightliner Century Class S/T, Argosy, Columbia, and Coronado

Data Codes

718-003 Salem Vent fan in lower left-hand sleeper sidewall
