One-Piece External Sun Visor

Freightliner Trucks now includes a one-piece exterior sun visor for Century Class and Columbia Trucks with SleeperCabs. The new stylish visor is approximately six pounds lighter than the previously used three-piece wrap-around visor. In addition, the design of the new visor is more aerodynamic than the current three-piece design, resulting in less resistance and drag, and greater fuel economy.

The one-piece visor also protects integral marker lights better than before with a molded aerodynamic cover. The cover provides protection of the marker lamps from rainwater, debris, etc.

Finally, by designing a visor that is all one piece, replacement time and parts expenses are reduced, keeping the truck out of the shop and on the road.

On Century Class trucks, the visor comes standard with LED marker lights. On Columbia trucks, incandescent lamps are standard.

Selling Points

- New stylish design
- More aerodynamic / fuel efficient
- Less expensive replacement parts and repair time
- Improved protection of integral marker lights
- Approx. six pound weight savings

Availability

Included on Freightliner Century Class S/T and Columbia with SleeperCab. LED marker lights optional on Columbia, standard on Century Class

Data Codes

764-014 One-piece fiberglass exterior sun visor (Included with SleeperCabs)
302-054 Freightliner LED marker lights integral with exterior sun visor
