Door Options for the Business Class M2

706-026 Molded plastic door panel with aluminum kick plate lower door

693-003 Plastic manifest box – LH

Freightliner Trucks offers several interior door options on the Business Class M2 to best meet your customer's needs. While the standard door treatment on the M2 is the molded plastic panel, we offer two popular options, the aluminum kick plate and the plastic manifest box.

The aluminum kick plate is a great option when rough service is expected from kicking the door panel upon exit. It can also add to the look and integrity of the lower door. The kick plate surface is textured to better hide scratches and scuff marks from heavy work boots.

The plastic manifest box provides a convenient storage location for maps, cell phones, vehicle driver's/maintenance manual or for other small items that need to be accessed easily.

Selling Points

- Interior door options to meet the needs of many customers
- Aluminum kick plate protects door panels and hides scuff marks
- Plastic manifest box provides convenient access to items stored within

Availability

Available on Business Class M2 106 and 112. The manifest box is not available on M2 106 with raised cab, the M2 112, or either model with the aluminum kick plate. 693-008 is not available with optional lower door window.
